- Be an active participant in your union.
- Find out what is going on in your worksite.
- Volunteer to assist in environmental initiatives in your community.
- Call/visit your MLA and remind them of why they need to be committed to environmental concerns.

GET INVOLVED! BE INVOLVED!

NAVIGATING TO A BETTER FUTURE

ACT

VS.

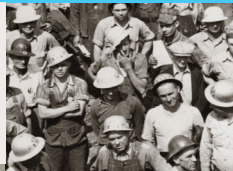

DELAY?

JOBS

A just transition means:

- Union jobs
- Workers not corporations get a say in the future we build
- Jobs that last not disappear with the next bust

HEALTH AND SAFETY

Less carbon pollution will:

- Save millions of lives every year from air pollution
- Prevents deaths, trauma, and dislocation from heat and natural disasters
- Save workers who care for our health and safety

ECONOMY

- Other nations are investing in carbon-neutral tech
- Carbon-neutral tech is more efficient and promotes economic growth
- If we don't invest now we will be left behind

AGRICULTURE

Limiting warming to 2° will:

- Reduce food inflation
- Protect soil/fertility loss
- Prevent the loss of climate sensitive crops like coffee, grapes, chocolate, and hops

THE TIME TO ACT IS NOW!
